

CAPABILITY STATEMENT

Accelerating Clinical Development

One enterprise. Four integrated platforms. Guosa Life Sciences helps sponsors, biotechnology companies, governments, and global health organizations develop innovative medicines — through scientific insight, professional development, connected research ecosystems, and operational excellence.

WHO WE ARE

Modern clinical development requires more than isolated services. Guosa Life Sciences connects knowledge, people, infrastructure, and operational excellence across the clinical development lifecycle — supporting sponsors from early development through post-marketing while strengthening research capacity worldwide.

THE GLS ENTERPRISE

Four Integrated Platforms

01 · THINK

GLS Institute

Clinical Development and Global Health. Research, publications, and benchmarks that inform decisions.

02 · LEARN

GLS Academy

Professional Education and Certification. Training, certification, and workforce development.

03 · CONNECT

Clinical Development Network

The global collaboration platform, organized through Centers of Excellence.

04 · DELIVER

Solutions

Integrated clinical, regulatory, laboratory, safety, and quality delivery.

Institute creates knowledge. Academy develops people. The Network connects the ecosystem. Solutions deliver the work.

CORE CAPABILITIES

Support Across the Lifecycle

- Clinical operations and monitoring
- Regulatory affairs and submissions
- Quality assurance and GCP compliance
- Data management and biostatistics
- Medical writing and medical affairs
- Pharmacovigilance and drug safety
- Laboratory and biomarker services
- Clinical supply, depots and logistics
- Feasibility and site identification
- Project governance and program strategy

THERAPEUTIC EXPERTISE

Vaccines and Infectious Diseases

Oncology

CNS and Neurology

Respiratory

Women's and Maternal Health

Cardiometabolic

Rare Diseases

Medical Devices

Public Health

THE CLINICAL DEVELOPMENT NETWORK

Reach Where It Matters

WHY GUOSA LIFE SCIENCES

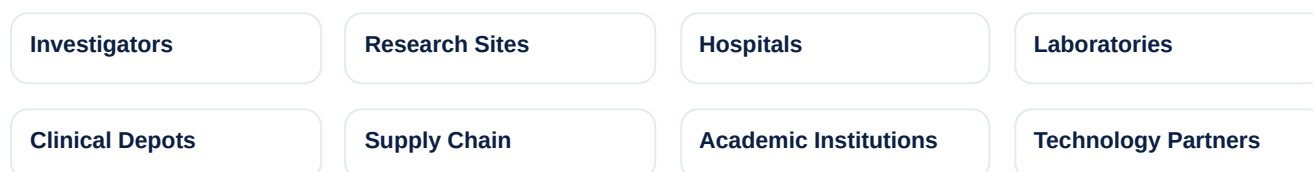

Integrated by Design

Better outcomes are achieved when research, education, collaboration, and operational delivery work together rather than independently. Our model reduces complexity, improves coordination, and accelerates timelines while maintaining quality and compliance.

- One point of accountability across sites, labs, depots and logistics
- Pre-qualified, research-ready sites to compress start-up
- Diverse patient populations across Africa and emerging markets
- GCP-aligned quality systems applied network-wide
- Technology-enabled collaboration and transparency
- Flexible, scalable delivery models
- Sponsor-focused project governance
- End-to-end lifecycle support

THE NETWORK COMMUNITIES

A Connected Ecosystem

CENTERS OF EXCELLENCE

How the Network Is Organized

The Clinical Development Network is global. It is the umbrella for a portfolio of regional, therapeutic, functional, and scientific Centers of Excellence. The flagship is **AE-PCRN** — the African Early Phase Clinical Research Center of Excellence, dedicated to early-phase research, translational medicine, vaccine innovation, and pandemic preparedness. Guosa Life Sciences serves as the Network Coordinating Center.

ENGAGEMENT

How to Start

Submit an RFP or contact our team for a confidential discussion. We will align on objectives, assess feasibility, match the right sites and investigators, and design an integrated delivery plan for your program.
